IT COOLING

CHILLERS

FR-G05-Z

AIR SOURCE CHILLERS WITH SCREW
COMPRESSORS, FROM 140 TO 1710 kW

r

R513A

FR-G05-Z

THE ECO-FRIENDLY SOLUTION FOR IT COOLING.

Driven by exponential growth of data exchange and rising power densities, data center design is rapidly changing, always striving to reducing their running costs while ensuring complete infrastructure dependability.

The awareness of the most demanding mission critical application requirements and the commitment to improve their sustainability has led to the development of the new FR-G05-Z range.

Cooling dependability and extended lifetime

Designed for continuous operation, FR-G05-Z meets the needs of the uninterrupted industry. Devoted devices and functions maximize the unit's uptime even in case of emergency circumstances.

IT COOLING APPLICATIONS

- ✓ Data centers and server rooms
- ✓ Technological hubs
- ✓ Telecommunication installations
- ✓ Laboratories and technical rooms

Reduced operating costs

FR-G05-Z is optimized to efficiently work with high temperature IT environments, delivering consistent cooling to the most advanced IT infrastructures. This, combined with the chiller's outstanding performance, brings a significant PUE reduction and helps to keep the OPEX (Operating Expenditure) under control.

COMPLETE RANGE OF CHILLERS

Low GWP from 140 to 1710 kW

E	Very high efficiency	EER: 3,35	SEPR HT: 5,42
CA	High efficiency	EER: 3,20	SEPR HT: 5,31
K	Key efficiency	EER: 2,88	SEPR HT: 5,19

Average values of FR-G05-Z 1502-7223.
EER conditions: water (in/out) 16/10°C, air 35°C, EN14511.
SEPR HT conditions: water (in/out) 12/7°C, EN14825.

ACOUSTIC VERSIONS

-	Standard	Unit with standard soundproofing equipment.	Baseline
		Unit with compressor acoustical enclosure (Opt. 2301).	-2 dB(A)
		Unit with noise reducer kit (Opt. 2315).	-7 dB(A)
SL	Super low noise	The highest level of noise reduction which cuts noise emissions by 10 to 12 dB(A), without compromising the unit's efficiency.	-12 dB(A)

HEAT RECOVERY CONFIGURATIONS

-	Standard unit	Unit for the production of chilled water.	Baseline
D	Partial heat recovery	A desuperheater on the compressor discharge line recovers approximately 20% of the unit's capacity.	60°C
R	Total heat recovery	A devoted refrigerant water heat exchanger recovers all the condensation heat.	55°C 60°C with HT kit

ALL-ROUND SUSTAINABILITY

FR-G05-Z is the result of Mitsubishi Electric Hydronics & IT Cooling Systems' extensive approach to sustainability.

Increasing concerns about the global warming impact of chillers and heat pumps is driving new regulatory policies to push towards even more efficient units with the lowest carbon footprint.

Today, an all-round approach is the only way to effectively reduce the Total Equivalent Warming Impact (TEWI).

Fully committed to support the creation of a greener tomorrow, Mitsubishi Electric Hydronics & IT Cooling Systems designed FR-G05-Z, a complete chiller range with reduced environmental impact, optimized for R513A refrigerant.

Combining brilliant annual efficiency with the use of a low GWP refrigerant, FR-G05-Z tackles both the indirect (due to primary energy consumption) and the direct global warming, thus resulting in the perfect choice for any new, forward-looking cooling system.

LOW GWP

-56% GWP vs R134a

Non-flammable
Safety Class A1

REFRIGERANT BENCHMARK

SCROLL		
Refrigerant	GWP*	Flammability**
R410A	2088	NON flammable
R32	675	MILDLY flammable
R454B	466	MILDLY flammable
R452B	698	MILDLY flammable

SCREW		
Refrigerant	GWP*	Flammability**
R134a	1430	NON flammable
R513A	631	NON flammable
1234ze	7	MILDLY flammable
1234yf	4	MILDLY flammable

*IPCC AR4

**ASHRAE 34 - ISO 817

New regulations like the EU F-gas and the Kigali Amendment to the Montreal Protocol, are driving the industry towards new eco-friendly refrigerants, with reduced greenhouse effect.

Unfortunately, the majority of low GWP refrigerants raises another critical issue: flammability.

The new refrigerant R513A, chosen for FR-G05-Z, is a brilliant exception: it offers a -56% GWP reduction compared to R134a's while ensuring complete non-toxicity and non-flammability (Class A1 of ASHRAE 34, ISO 817).

PROFOUND EXPERTISE

TOP-LEVEL PERFORMANCE

With thousands of units installed worldwide since 2003, RC air-cooled screw chillers have evolved into the third generation: FR-G05-Z series. The highest manufacturing quality, proven reliability, and full configurability are the reasons behind the success of this range. Today FR-G05-Z combines extensive expertise with the latest technology to deliver you the best value.

Fully customizable with a range of versions and accessories, FR-G05-Z allows custom-made application design for individual projects. Thanks to devoted technological solutions and accurate design, each FR-G05-Z configuration brings high full load performance and brilliant part load efficiency together, thus helping individuals and businesses reduce the energy consumption of their HVAC systems and cut their running costs.

TECHNOLOGICAL CHOICES

W3000TE CONTROL

- Fully in-house developed management software.
- ▶ Efficient and reliable operation in all conditions
 - ▶ Connectivity with the most commonly used BMS protocols (Opt.)

KIPlink USER INTERFACE

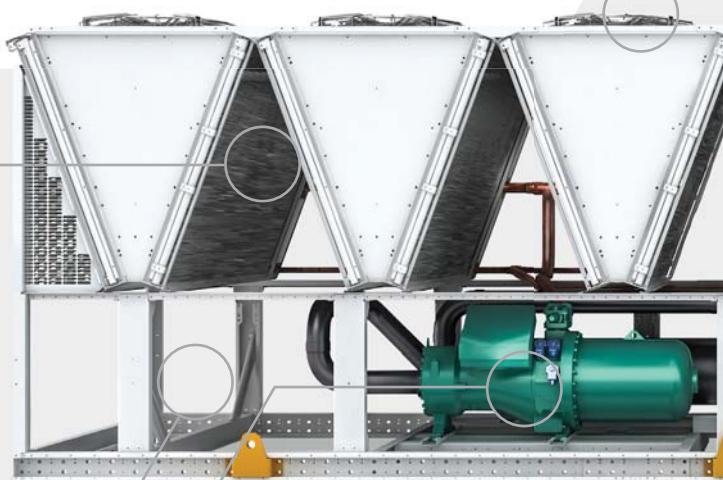

Innovative Wi-Fi interface for an easy and enhanced unit management.

Micro-channel coils

New generation full aluminum micro-channel coils, ideally positioned on a "V" block structure to optimize airflow and heat transfer.

- ▶ Up to 30% of refrigerant charge reduction vs. traditional tube and fin coils.
- ▶ Long Life Alloy (LLA) for higher corrosion resistance and longer life cycle
- ▶ Protective coating available for harsh industrial and marine environments (Opt.)

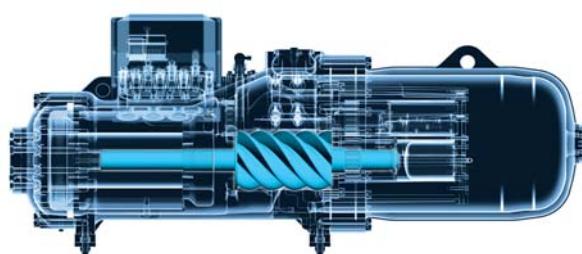

Built-in pump group (Opt.)

Factory-mounted pumps and pre-plumbed hydraulic components, for the minimum on-site installation time, work and cost.

- ▶ Fix speed and variable speed pumps available, with low or high head
- ▶ Electronic primary flow controls for constant pressure or constant temperature

CSC screw compressors

Dual rotor screw compressors designed according to Mitsubishi Electric Hydronics & IT Cooling Systems specifications and for its exclusive use.

FR-G05-Z brings advanced technology and know-how together in customizable packages to aid design, specification, installation, and on-going operations.

r

R513A

Variable speed fans

High performing axial fans equipped with autotransformer for speed adjustment.

- ▶ Precise air-flow management, reduced power consumption and lower sound levels at part load
- ▶ Totally independent ventilation system for each refrigerant circuit
- ▶ EC fans available with proprietary algorithm for energy savings and very low ambient operation (Opt.)

Low GWP refrigerant

New generation refrigerant with reduced greenhouse effect. Non-flammable.

Reduced GWP

R513A GWP_{100 year} = 572
(R134a GWP_{100 year} = 1300)
GWP values according to IPCC AR5

Non-toxic, non-flammable

ASHRAE 34, ISO 817: A1 class

Favorable physical properties

Same cooling capacity delivered as R134a
Same operating pressures as R134a

In line with standard building codes

No special equipment
No need for flammable risk assessment
No extra costs

Compliant with eco regulation objectives

No future retrofit required
Reduced price volatility

Shell and tube evaporator

Dry expansion, single pass shell and tube evaporator, fully developed by Mitsubishi Electric Hydronics & IT Cooling Systems.

- ▶ Internally grooved copper tubes for enhanced heat exchange
- ▶ Low pressure drops
- ▶ Fully protected against ice formation

Brazed plate evaporator for small sizes (<200 kW)

Innovative internal geometry

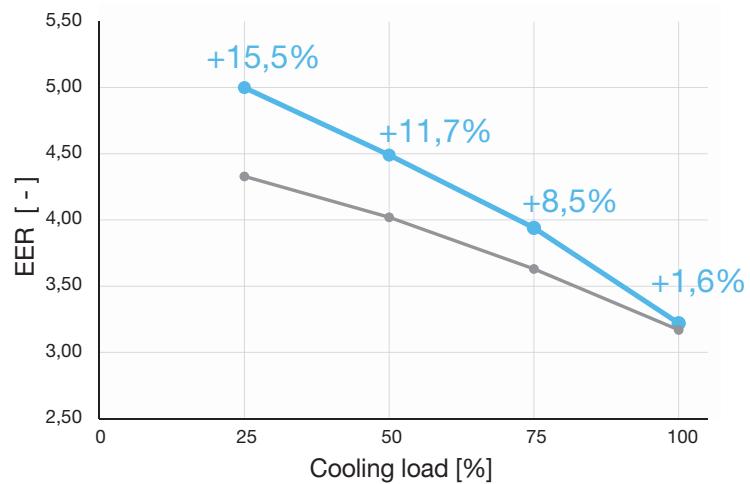

Thanks to its specific design, aimed at optimizing the internal volumes for partial load operation, the CSC compressors deliver excellent performance in all the different operating conditions.

Enhanced lubrication system

A special oil management valve calibrates the oil circulation and delivers a remarkable increase of the compressor efficiency at partial loads.

Extreme durability

The brilliantly engineered mechanics include carbon steel bearings guaranteed for a lifetime of 150.000 hours.

The graph shows the chiller efficiency with the variation of the load rate and air temperature (ESEER operating conditions).

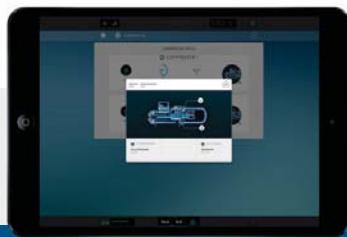

CORE FEATURES FOR ALL YOUR EQUIPMENT NEEDS

W3000TE control and KIPlink innovative interface

The logic behind FR-G05-Z is the W3000TE control software. Characterized by advanced functions and algorithms, **W3000TE features proprietary settings** that ensure faster adaptive responses to different dynamics, in all operating modes. Direct control over the unit comes through the innovative KIPlink interface.

Based on Wi-Fi technology, **KIPlink** gets rid of the standard keyboard and **allows one to operate on the unit directly from a mobile device** (smartphone, tablet, notebook).

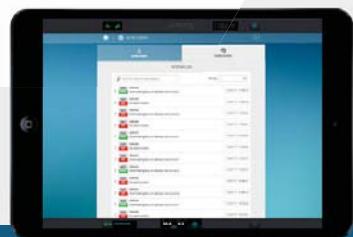

Easier on-site operation

Monitor each component while moving around the unit for maintenance operations. View and change all parameters with easy-to-understand screenshots and dedicated tooltips. Get devoted “help” message for alarm reset and trouble shooting.

Real-time graphs and trends

Monitor the immediate labor status of the compressors, heat exchangers, cooling circuits and pumps. View the real-time graphs of the key operating variable trends.

Data logger function

View history of events and use the filter for a simple search. Enhance diagnostics with data and graphs of 10 minutes before and after each alarm. Download all the data for detailed analysis.

How to access the unit with KIPlink

Direct access to the W3000TE control is achieved by scanning the QR-code positioned on the front side of the FR-G05-Z unit.

LED switch

The three-colour LED button positioned on the electrical board allows the user to switch the unit on/off and visualize the general status of the equipment without using any mobile device.

In addition (Opt. 1442, 1444) or in substitution (Opt. 6194, 6195) to the KIPlink, FR-G05-Z can be provided with: a 7" color touch screen interface or with a keyboard with large display and LED icons. In these cases, the LED switch is not provided. Remote keyboard is possible (Opt. C9261063, C9261064, C926108911, C926108913).

Witness Testing

Test your chiller before its installation and make its performance totally reliable.

Performance WITNESS TEST

Performance Witness testing is available as additional service in order to allow the final user to see the unit being tested under specific conditions. Carried out within modern and sophisticated facilities, this service gives the customer the possibility to choose among different witness test options in order to:

- ▶ Verify unit operation under severe conditions
- ▶ Detect sound emissions
- ▶ Check performance, both at full and partial loads
- ▶ Test the unit with low outdoor air temperature operation
- ▶ Time the fast restart

Hydronic modules and flow controls

The FR-G05-Z units can be equipped with a factory-mounted complete pump group, which **optimizes hydraulic and electrical installation space, time and costs, or simply with terminals to control the external pumps with the unit control logic.**

Close-coupled pumps by Grundfos

SiC/SiC (silicon carbide) primary seal pairing, extremely resistant against wear, abrasive particles and wear.

EPDM bellows seal prevent the risk of deposits, such as rust, on the shaft.

Pull-out design: during maintenance the power head can be pulled out without removing the pump housing from the pipework.

In-line or end-suction models were chosen based on dimensions and performances

Factory-mounted pump group 2 pumps (duty/standby) provide low or high head (available head approx. 100 or 200 kPa).
1 pump available for single compressor units.

Fixed speed pumps

1 pump	LH 2-poles: Opt. 4706
	HH 2-poles: Opt. 4707
2 pumps	LH 2-poles: Opt. 4711 / 4-poles: Opt. 4708
	HH 2-poles: Opt. 4712 / 4-poles: Opt. 4709

Variable speed pumps

1 pump	LH 2-poles: Opt. 4717
	HH 2-poles: Opt. 4718
2 pumps	LH 2-poles: Opt. 4722 / 4-poles: Opt. 4719
	HH 2-poles: Opt. 4723 / 4-poles: Opt. 4721

Terminals for external pump control

The unit controls the activation or the activation and speed of 1 or 2 external pumps.

ON/OFF signal

1 pump	Opt. 4702
2 pumps	Opt. 4703

Modulating signal

1 pump	Opt. 4713
2 pumps	Opt. 4714

VPF control logic

The VPF control series (Variable Primary Flow) doesn't only **adjust the pump speed on the basis of the plant's thermal load**, but also **dynamically optimizes the unit's thermoregulation** for variable flow operation, thus ensuring both the highest pump energy savings and chiller stable operation.

VPF: constant ΔP on the plant side

For systems with only the primary circuit.
Opt. 4864 or 4865 for single unit system
Opt. 4866 for multi-unit system

VPFD: constant ΔT on the plant side

For systems with primary and secondary circuits separated by a hydraulic decoupler.
Opt. 4867 for single unit system
Opt. 4868 for multi-unit system

For quick and easy commissioning, it is possible to adjust the pump speed directly from the unit control (Opt. 4862).

Operating limits

- Standard unit
- Required: Kit HT (Opt. 1955)
- Required: EC fans (Opt. 808)
- Required: DBA device (coil flooding) (Opt. 813)
EC fans (Opt. 808)

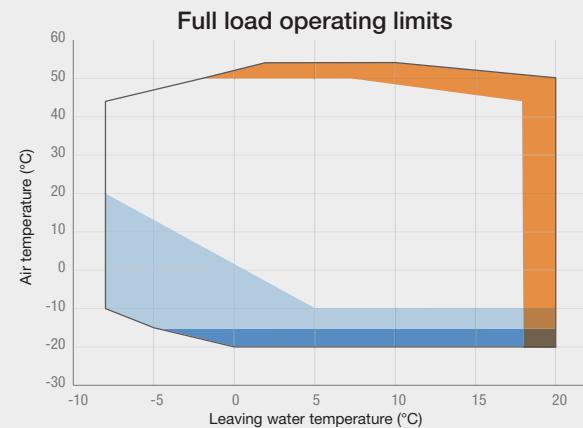

Air temp. < -10°C: Double insulation on heat exchangers (Opt. 2631)
LWT < 0°C: Compressor liquid injection (Opt. 871)

Partial load operating limits

In case of higher outdoor air temperature, FR-G05-Z automatically partializes its resources to ensure uninterrupted operation (HPTC function).

Operating limits when working partialized (water *7°C):

/K, /SL-K	53°C
/E, SL-E	55°C
/CA, SL-CA	55°C
+kit HT (all versions)	57°C

The diagram shows the operating limits of versions /E, /SL-E
For versions /K, /SL-K, the max outdoor temperature is lowered by 4°C
For versions /CA, /SL-CA, the max outdoor temperature is lowered by 2°C

ACCESSORIES

EC fans

EC fans (Opt. 808): Electronically commutated fans with brushless motor to continuously adjust the speed in order to minimise energy consumption and noise emissions, especially at part loads (+1% of EER, +3% of SEPR HT).

+3%
SEPR HT

Noise reduction

Compressor acoustical enclosure (Opt. 2301):

Enclosure realised with painted sheet metal panels lined with an acoustic insulation.
Sound power reduction: -2 dB(A).

Noise Reducer kit (Opt. 2315):

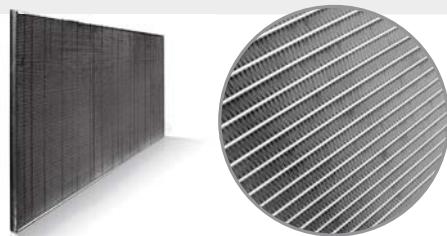

The kit includes dedicated fans' speed calibration together with the soundproofing of the most critical components.
Sound power reduction: -7 dB(A).

Coils and coatings

MICROCHANNEL COILS

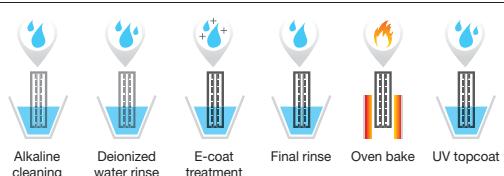

Al - Regular (std)

Al - E-coating (Opt. 876)

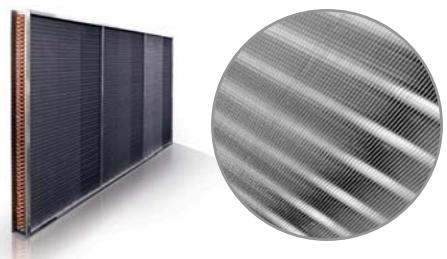

E-coating process

TUBE & FIN COILS

Cu/Al - Regular (Opt. 879)

Cu/Al - Pre-painted fins (Opt. 894)

Cu/Al - High pressure spray coating (Opt. 895 / RFQ)

Fin Guard Silver SB * Opt. 895

Polyurethane resin with aluminum fillers

- ✓ 3000 h ASTM B117
- ✓ UV rays - excellent

* Thermoguard

PoluAI XT * RFQ

Polyurethane resin with aluminum fillers

- ✓ 4000 h ASTM B117
- ✓ UV rays - excellent

* Blygold

Heresite P-413C * RFQ

Phenolic resin

- ✓ 6000 h ASTM B117
- ✓ UV rays - good

* Heresite Protective Coating, LLC

Cu/Cu - Tube & fin coil (Opt. 881)

EQUIPMENT FOR MISSION CRITICAL APPLICATIONS

Committed to ensure the highest standards of reliability, FR-G05-Z includes a full range of devices and functions that maximize unit's uptime in case of emergency circumstances.

FAST RESTART

Ensures a **faster return to the necessary cooling levels** in the shortest time possible, while maintaining the **reliability** of the chiller.

Ensure immediate cooling start-up within 25"

Have the unit running at full load in a shorter time

A 2-cpr unit in standard working conditions delivers 100% of cooling capacity within 180" after power is restored.

Fast restart - UPS excluded (Opt.4501)

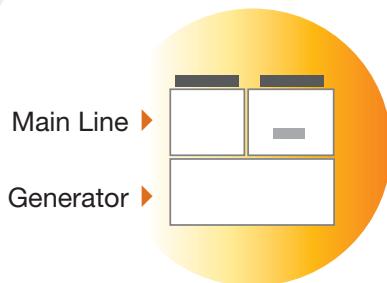

This option requires an external 230V AC UPS, not supplied with the unit, to keep the on-board controller functional and ensure fast restart after a power outage.

Fast restart - UPS included (Opt. 4502)

This option includes an electric device capable of keeping the controller power supply uninterrupted during a power failure. The capacity of this device is selected on the basis of the needs of a specific project.

DOUBLE POWER SUPPLY

Redundancy increases uptime. FR-G05-Z extends this concept also to the electrical supply: the unit, equipped with an ATS*, can be connected to two separate power lines to enhance the system's dependability.

In case of a main line power outage, the ATS* automatically switches over to the backup line, granting uninterrupted power supply to the unit. The double power supply makes FR-G05-Z suitable for Uptime Institute's TIER III and TIER IV** design topologies, the highest standards of reliability.

* ATS: Automatic Transfer Switch

** The Tier Classification System provides the data center industry with a consistent method to compare typically unique facilities based on expected site infrastructure performance, or uptime.

Double power supply (ATS) (Opt. 1561)

The ATS, installed within the electrical board, automatically senses if one of the sources has lost or gained power. The switching is completely automatic (line priority and frequency of checking are selectable).

Double power supply (Motorized changeover) (Opt. 1562)

The motorized changeover, installed within the electrical board, is with remote control (i.e. signal of generator start-up).

ENERGY METER

You can't manage what you don't measure.

PUE (Power usage effectiveness) is the ratio that determines how energy efficient data centers are comparing the power currently used for the IT equipment with the power used by the infrastructure which keeps that IT equipment working, including the cooling system.

Energy meter option allows to acquire the electrical data and the power absorbed by the unit and send them to the supervisor for energy metering.

8 Sound power on the basis of measurements made in compliance with ISO 9614.

9 Sound power level in cooling, outdoors.

10 Unit in standard configuration/execution, without optional accessories.

The units highlighted in this publication contain R513A [GWP₁₀₀ 631] fluorinated greenhouse gases.

8 Sound power on the basis of measurements made in compliance with ISO 9614.

9 Sound power level in cooling, outdoors.

10 Unit in standard configuration/execution, without optional accessories.

The units highlighted in this publication contain R513A [GWP₁₀₀ 631] fluorinated greenhouse gases.

**FR-G05-Z 1502 - 7823**

8 Sound power on the basis of measurements made in compliance with ISO 9614.

9 Sound power level in cooling, outdoors.

10 Unit in standard configuration/execution, without optional accessories.

The units highlighted in this publication contain R513A [GWP₁₀₀ 631] fluorinated greenhouse gases.

Certified data in EUROVENT

FURTHER OPTIONS

Auxiliary input

- 4-20 mA (Opt. 6161):** Enables remote set-point adjustments (analog input).
- Double set-point (Opt. 6162):** Enables the remote switch between 2 set-points (digital input).
- Demand limit (Opt. 6171):** Limits the unit's power absorption for safety reasons or in temporary situations (digital input).

Electrical

- Compressor rephasing (Opt. 3301):** The capacitors on the compressors' line increase the unit's power factor.
- Automatic circuit breakers for compressors (Opt. 3411) or all major electrical loads (Opt. 3412):** Protects the compressors or the compressors and fans from possible current peaks, over-current switches are provided in place of the standard fuses.
- Soft-starter (Opt. 1511) or 3-phase soft-starter (Opt. 1513):** Manages the inrush current enabling lower motor windings' mechanical wear, avoidance of mains voltage fluctuations during starting and favorable sizing for the electrical system.

Connectivity

- BMS connection:** Serial card interface module to allow integration with BMS protocols:
Modbus (Opt. 4181) / LonWorks (Opt. 4182) / BACnet MS/TP (Opt. 4184) / BACnet over IP (Opt. 4185).
- M-Net interface kit (Opt. 4187):** Interface module to allow the integration of the unit with Mitsubishi Electric proprietary communication protocol M-Net.

Energy Meter

- Energy meter for BMS (Opt. 5924):** Acquires electrical data and the power absorbed by the unit and send them to the BMS for energy metering (Modbus RS485).

Refrigerant circuit

- Dual pressure relief valves with switch (Opt. 1961):** One valve is isolated from the refrigerant circuit while the other is in service. The user can work on the isolated valve for periodic maintenance or replacement, without removing the refrigerant from the circuit.
- Compressor suction valve (Opt. 1901):** Installed on each compressor suction line, it simplifies maintenance activity (discharge valves are present as per standard).

Refrigerant leak detector

- Leak detector (Opt. 3431):** Factory installed device. In case of a gas leak detection it raises an alarm.
- Leak detector + compressor off (Opt. 3433):** Factory installed device. In case of a gas leak detection it raises an alarm and stops the units.

Hydraulic

- Water flow switch (Opt. 1801):** Designed to protect the unit where the water flow across the evaporator is not sufficient and falls outside of the operating parameters.
- Delta T > 8°C (Opt. 2881):** Evaporator designed to operate with low primary circuit water flow.
- Flanged hydraulic connections (Opt. 2911):** Grooved coupling with flanged counter-pipe.

Structure

- Anti-intrusion grilles (Opt. 2021):** Perimeter metal grilles to protect against the intrusion of solid bodies into the unit structure.
- Rubber type (Opt. 2101) or spring type (Opt. 2102) anti-vibration mountings:** Reduce vibrations, keeping noise transmission to a minimum.

Packing

- Reinforcing bars (Opt. 1971):** Steel brackets used to strengthen the unit structure. Suggested in case of long truck transport.
- Nylon packing (Opt. 9966):** FR-G05-Z is covered with a protective nylon layer and provided with the lifting eye-plates, to load the unit into a truck.
- Container packing (Opt. 9979):** FR-G05-Z is covered with a protective nylon layer, provided with structural reinforcing bars and equipped with both lifting eye-plates and handling devices to load it on a container (metal slides, front handling bar).
